Jaypee Hernandez
Power Platform Developer | Consultant

Work Experience

Cardinal Health
December 2024 - Present
Power Platform Developer | Consultant
- Develop and optimize Power Platform solutions with SQL Server as the backend.
- Lead the Idea Incubation Team, managing project pipelines and task assignments.
- Oversee end-to-end solution development, from concept to deployment.

Willis Towers Watsons
June 2019- November 2024
Team Lead - Compliance and Automations
Leadership
- Lead teams by setting clear goals, allocating tasks, and fostering professional growth.
- Act as a liaison between management and the team, ensuring effective communication.
- Analyze issues, implement solutions, and provide regular reports to leadership.

Process Automation
- Responsible for the automation of manual processes using Microsoft Power Platform tools (PowerApps, Power Automate, Power BI), achieving significant efficiency gains and reduced processing times.
- Designed and implemented custom applications in PowerApps to streamline workflows.
- Developed automated workflows in Power Automate, created interactive Power BI dashboards, and utilized VBA and SQL for data manipulation and reporting, driving data-driven decisions across departments.

Compliance - Health and Benefits
Conducts comprehensive analyses, including Nondiscrimination Testing (NDT), MHPAEA Qantitative treatment limitations and financial performance evaluations (FPA, PUT, IBNR, and FBS), delivering actionable insights for decision-making.

Accenture Inc. supporting Microsoft Corporation
June 2016 - January 2019
Collections and Part-Time Tech Master
Collections:
  - Collect and recover customer receivables and debt.
Reporting
  - Acquiring data from other sources, creating reports on a regular basis, correcting any code issues, and ensuring that databases remain error-free and organized.
Part-Time Tech Master and OE practitioner
  - Review each process using OE methodology and look for areas that can be automated. Once identified, looking for a way to automate the repetitive processes.
